
eTwinning **An Emerging** **Transformative** **Pedagogy**

eTwinning Coordinator

Dr. Rose-anne Camilleri

Education Officer Digital Literacy & Transversal Skills

An innovative pedagogy based on collaborative and networked Learning. eTwinning can be linked with the Learning Outcomes Framework and promoted as a vehicle to develop cross-curricular themes and activities as well as 21st century skills.

The eTwinning concept

Benefits Why eTwinning?

eTwinning addresses the
Learning Outcomes Framework
– The educators' guide for
pedagogy and assessment

Learner Centred Approach

The Cross Curricular Themes

Education for
Entrepreneurship,
Creativity and
Innovation

Literacy

Education for
Sustainable
Development

Learning to Learn
& Cooperative
Learning

Digital Literacy

Education for
Diversity

- Innovation, transformation of pedagogy
- It is merged into digital literacy
- Technology seen as empowering educators and students
- Collaboration, content creation, real live audiences
- Active participation brings about engagement, motivation and learning both for educators and learners
- Development of global competencies
- Intercultural Awareness

What we have

What do we need to teach in this context?

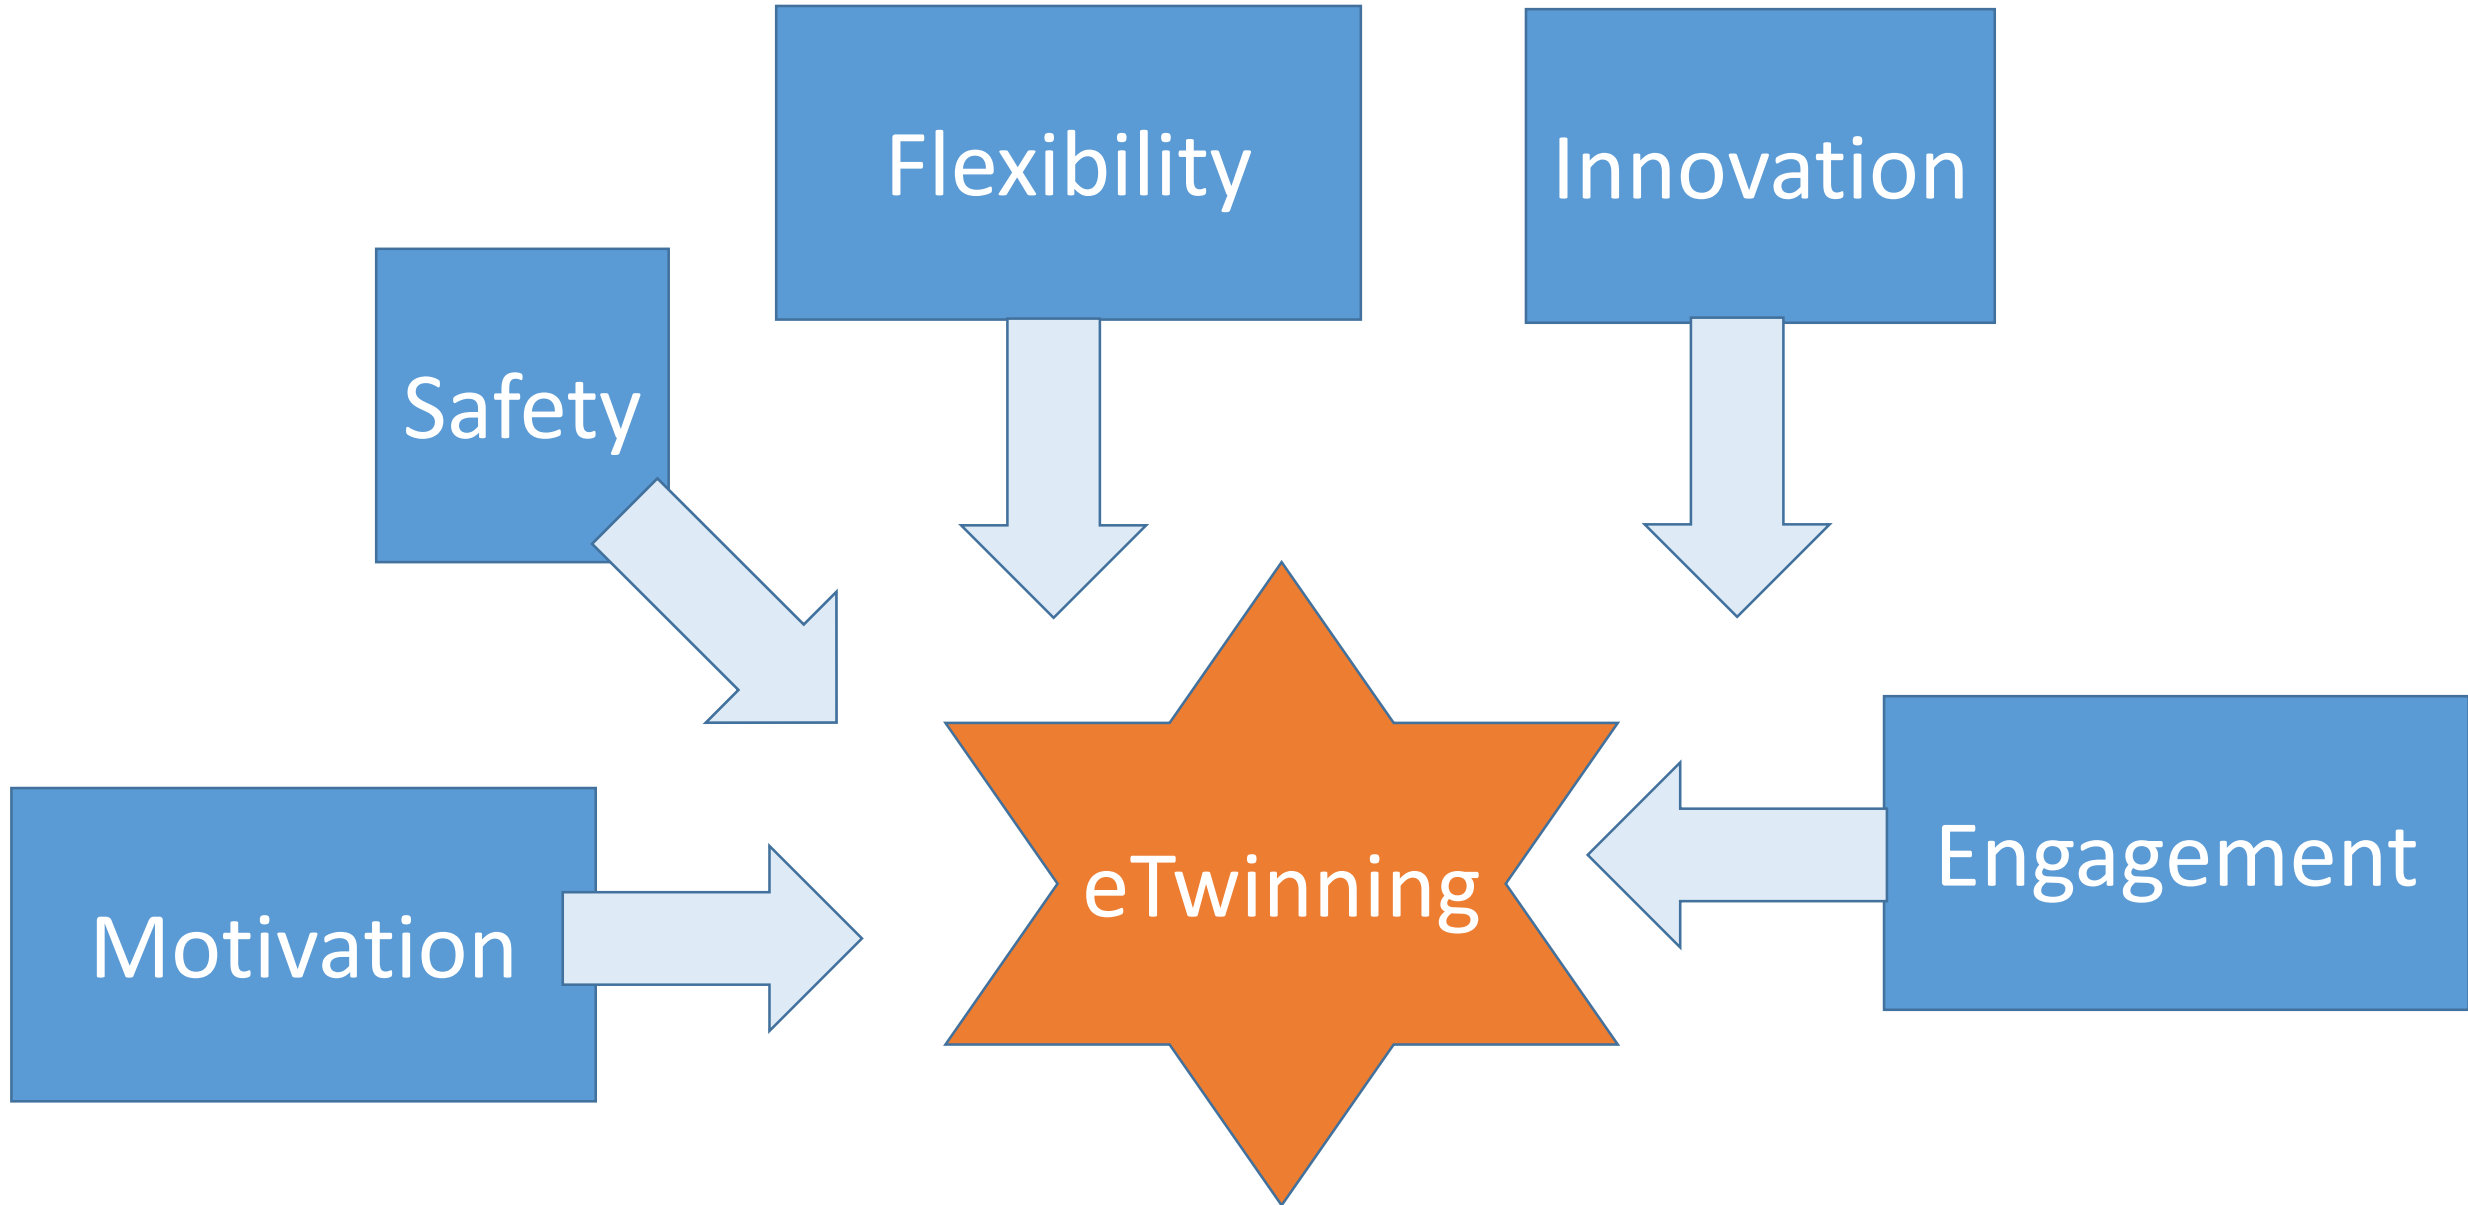

What we need

Change

Adapt

Update

Why eTwinning

WHY ETWINNING?

- ★ **eTwinning has the power to transform education and that power is in our hands as educators.**
- ★ **eTwinning takes the teacher away from the centre but keeps him/her in a very central position to educate young citizens.**

- eTwinning Live

People, Projects (project kits), Partner Finding

- TwinSpace

CRITERIA FOR QUALITY LABELS

Pedagogical innovation

- the project has originality in terms of its theme
- it uses a variety of pedagogical methods
- pupils are the ones who take the lead
- pupils interact with their partners and work collaboratively using different methods like information gathering, problem solving, research, comparative work
- pupils take different roles as artists, journalists, technicians, scientists, actors etc.

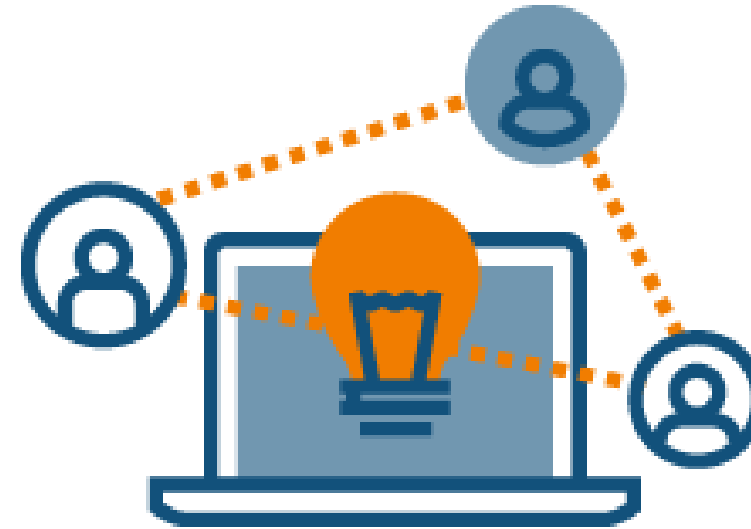

Curricular integration

- the project is rooted in the school curriculum and syllabi
- the majority of project work is done during school hours
- the curricular integration in the project is clear
- project work allows students develop their skills and competences
- the project-based pedagogical framework has been explained and documented by the teacher

Collaboration between partner schools

- collaboration activities go beyond communication
- partner schools work together to accomplish joint activities
- partners are not just recipients of information
- collaborative activities result in tangible outcomes

Use of technology

- the technology is used to help the partners achieve their pedagogical objectives
- the tools help partners to collaborate better among themselves

Results, impact and documentation

- the project results are presented online
- students are involved in the TwinSpace
- all steps of the project are documented including planning - activities' description - evaluation – feedback
- you evaluate and publish the impact that the project had on the students and teachers involved in the project.
